Education

NIST University

B.Tech in Computer Science and Engineering — CGPA: 8.47/10

Berhampur, Odisha

2023 – 2027

Experience

Proto Corp Pvt Ltd

Software Engineer Intern

Remote

Mar 2026 – Present

- Built a full-stack drone fleet monitoring platform using Next.js, Socket.IO, Agora RTC, and Leaflet.js, enabling real-time fleet telemetry, live video streaming, and map-based drone tracking.
- Implemented real-time telemetry delivery with Socket.IO and an EMQX MQTT pub/sub layer, processing drone metrics including speed, altitude, charging status, flight paths etc.
- Containerized and deployed the application on AWS EC2 using Docker Compose and GitHub Actions, implementing blue-green deployments with Nginx reverse proxy and Certbot certificate management;

Torqis Horizons

Backend & Cloud Engineer Intern

Remote

Sep 2025 – Jan 2026

- Built a serverless e-commerce backend for automotive accessories and spare parts using Node.js, AWS Lambda, and API Gateway, with Amazon RDS for application data and AWS SAM for infrastructure deployment.
- Integrated PhonePe payment APIs and webhooks into Lambda-based payment workflows, implementing idempotent transaction processing by validating transaction state before updating orders.
- Served product images and brand assets through Amazon S3 and CloudFront, and used CloudWatch for Lambda monitoring and AWS SAM-based deployments.

GoLaddu Food Products Pvt. Ltd.

SDE Intern

Remote

Aug 2025 – Oct 2025

- Built a React Native Expo social networking application from Figma designs, integrating Supabase and PostgreSQL for application data and real-time synchronization.
- Implemented backend APIs using Supabase Edge Functions and integrated PostgreSQL subscriptions for real-time application updates.
- Set up GitHub Actions CI/CD for React Native builds and deployments across Android and iOS environments, reducing deployment time by 30%.

Projects

Observability Platform | TypeScript, Docker, Kubernetes, ArgoCD, Prometheus, Grafana

- Developed a real-time observability dashboard and REST APIs for monitoring distributed microservices.
- Deployed cloud-native infrastructure using Docker, Kubernetes, ArgoCD, Prometheus, and Grafana to improve system observability and operational visibility.

NSE Stocks Arbitrage Bot | TypeScript, Express.js, Rust, LangChain, LangGraph

- Built an automated arbitrage trading system executing cross-exchange strategies with 15% annualized returns in backtesting.
- Processed 1M+ stock market data points daily with real-time analysis latency below 200ms.

Memory Allocator in C | C, Makefile

- Built a custom memory allocator using segregated free lists with coalescing and block splitting techniques.
- Reduced memory fragmentation and improved allocation efficiency through optimized memory management and alignment strategies.

Technical Skills

Languages: TypeScript, JavaScript, Java, C, Rust

Backend: Node.js, Express.js, NestJS, REST APIs, WebSockets, Socket.IO, MQTT, WebRTC

Databases: PostgreSQL, MongoDB, Redis, Supabase

Cloud & DevOps: AWS (EC2, Lambda, CloudWatch, CloudFront, S3, Cognito), Docker, Kubernetes, Terraform, GitHub Actions

Systems: Microservices, Message Queues, Caching, Load Balancing

AI: LangChain, LangGraph, Groq API, Gemini API

Achievements

- TechFiesta International Hackathon Finalist 2025:** Ranked among the Top 100 teams out of 600+ global teams and secured Top 5 position in the Grand Finals among 60 finalists.
